## WORK EXPERIENCE

### DEVOPS ENGINEER

*Realnaut*

Mar 2023 - present

- Led the design, built and implementation of a complete set of Terraform modules to deploy all infrastructure at once, which reduced coding time, improved readability, and accelerated the implementations.
- Improved developer experience by improving the performance of the Gitlab CI/CD and provided automatic deployments and rollouts with Argo CD.
- Assisted and ensured the efficient use of cloud resources by using FinOps strategies and cloud cost optimization with Kubecost.
- Ensured the applications high availability with the implementation of Prometheus and OpenTelemetry.

### PLATFORM ENGINEER

*Empathy.co*

Jul 2021 - Mar 2023

- Deployment and administration of multiple Kubernetes clusters in the cloud (EKS and GKE).
- Deployment and management of AWS Infrastructure as Code following best practices with Terraform, Atlantis and Infracost (EKS, EC2, IAM, S3, Route53..).
- Optimization and maintenance of CI/CD processes to ensure automated and safely deployments with Jenkins, Github Actions, Helm and Argo CD.
- Manage a wide set of tools like Harbor, Prometheus, Grafana, ElasticSearch or GitHub Runners to ensure the best developer experience and reliability.

### DEVOPS INTERNSHIP

*Empathy.co*

May 2021 - Jul 2021

- Learned best practices and technologies such as Docker, Kubernetes, Helm, Github Actions and Argo CD for creating and managing Cloud Native applications.
- Deployed the Backstage platform to serve as a centralized services portal for the company from scratch as a learning initial project.
- Followed most used agile methodologies such as SCRUM and Kanban and a multiple set of related tools like Jira and Confluence to track progress.
